# Team Alpha Super Awesome Cool Dynamite Wolf Squadron presents:
# SuperWiki

Presented by:
Ballard Ingram, Stephen Fike,
Nathan Greiling, Matthew Berti,
Kevin Heaton, Vicente Garcia

# Elevator pitch

# Concept

1. Description
   a. Lists information about your favorite Marvel characters!
2. Motivation for Development
   a. Gives people a place to start getting into marvel in a way that is not overwhelming.
3. User story
   a. AS a Marvel fan, I WANT to be able to search for different Marvel characters, SO I can easily see information on said characters

# Process

1. Technologies used
   a. Tailwind, jQuery, Marvel API, Movie API

2. Breakdown of tasks and roles
   a. Ballard Ingram - CSS Style, Media, HTML Structure
   b. Stephen Fike - Marvel API, Tailwind styling
   c. Nathan Greiling - Marvel API, Local Storage
   d. Matthew Berti - Added Popular Movies Array from Movie API into Webpage
   e. Kevin Heaton - initial HTML, Wireframe, assist with Tailwind, Presentation
   f. Vicente Garcia - JavaScript & Movie API

3. Challenges
   a. Finding APIs that gave us what we wanted
   b. Getting names, descriptions, and pictures of characters to align
   c. Working with a new framework

4. Successes
   a. Using GitHub
   b. Successfully displaying information on characters pulled from Marvel API

# Directions for Future Development

1. Include list of comics and TV shows on search
2. Clicking on a character will display only that character
3. Movies display all movies containing that character
4. Have recommended cocktails based on each character
